## **Covid Safety:**

- We are extremely covid safety conscious and hope to manage a safe and healthy event
- For everyone's health we encourage only those fully vaccinated and boosted to travel and participate
- We have chosen meeting space with reduced occupancy to allow for distancing
- We expect to operate the meeting with a tight mask mandate whenever inside the meeting room or other venues unless eating or drinking, and will have respirators available for anyone who does not have their own
- We will supply and ask every attendee to test each day before entering the meeting room
- We will use CO2 monitors to ensure ventilation levels are adequate
- In addition, we will supply portable air cleaning capacity to ensure the room experiences at least 6 equivalent air changes per hour.
- The meeting room has an external door and balcony which will help with fresh air, and is accessible to a courtyard which we hope to be able to use for breaks, weather permitting
